

# Level up your pharmacy career!

Explore diverse pharmacy technician opportunities in Texas.

Are you a driven and dedicated pharmacy technician looking for more than just filling prescriptions? At Cook Children's, we offer a diverse range of career paths for pharmacy technicians, allowing you to specialize, advance and make a significant impact on patient care. We value our technicians and invest in their growth by offering opportunities for new skills and challenges.

## Pharmacy technician I

Solidify your foundational skills in key areas like central processing operations, compounding, narcotics management, Omnicell refills and compliance audits. This is a great starting point for a rewarding pharmacy career.

## Pharmacy technician II

Take your expertise further! Build upon your "tech I" knowledge with advanced Omnicell processing, advanced non-sterile compounding and advanced sterile preparation (including specialized training in TPNs or chemotherapy). You can also specialize in areas like pharmacy satellites, TPN or chemotherapy.

### **Medication history technicians**

Obtain accurate patient medication histories and update the electronic health record (EHR), directly influencing the medication orders made by physicians and other health care providers.

### **Clinical pharmacy technicians**

Provide comprehensive pharmacy services throughout the patient's stay. You'll be providing optimal pharmaceutical care, from obtaining medication histories to coordinating medication distribution and supporting clinical pharmacists.

### **Pharmaceutical procurement/buyers**

Play a vital role in ensuring our pharmacy operates efficiently. You'll be responsible for purchasing functions, inventory control, and ensuring cost-effective, high-quality services and products.

### **Lead technicians**

Step into a leadership position and assist pharmacy management in coordinating technician services, training new staff and overseeing workflow in key areas like central pharmacy, Omnicell, narcotic processing and pharmacy automation.

### **Pharmacy technician supervisors**

Manage and supervise technician staff under the guidance of the pharmacy operations manager. Key responsibilities include building a strong distribution team and improving operational workflow, safety and efficiency.

## **Why choose Cook Children's?**

We offer a supportive environment, professional development opportunities, competitive benefits and a team dedicated to providing excellent patient care.
