

Connecting your baby to the care he needs

Pediatric Surgery – Circumcision referral

Our team performs circumcisions in the office with local anesthesia on male newborns who are younger than 12 weeks and who weigh less than 15 pounds. For premature infants the age may be slightly extended. Here are the next steps:

- We'll call you to schedule an appointment. Please note that our number might have an unfamiliar area code. If you miss our call, we'll leave you a voicemail with all the details.
- Download the myCookChildren's app to see your child's upcoming appointment details, location information and message our surgery team with any questions.
- Ensure you have the documentation showing that your baby received Vitamin K at birth and that he's been added to your insurance.*
- Once scheduled, write your appointment date below.

See you soon!

* Babies must have active insurance or the procedure will be billed at a self-pay rate, as mom's insurance will not cover specialty care for babies. If you are not using insurance, we will provide you with a self-pay estimate.
